Redefining the Future of SME Growth ... AI &

WHO WE ARE

Empower SMEs for
Sustainable Growth

Impact-Driven

Innovative approaches
Tech-enabled solutions

OUR FOCUS

ENTERPRISE UPGRADING

- Growth and business strategy
- Leadership & change management
- Management systems upgrading
- Access to advanced technologies
- Investment readiness
- Export readiness
- Market access
- Digital transformation & AI adoption

MARKET SYSTEM FACILITATION

- Sector dynamics and competitiveness analysis
- Market system and value chain studies
- Linkage facilitation with relevant actors
- Ecosystem mobilization
- Program development
- Intervention Design
- Policy recommendations

SME Realities

Short-term Focus

Centralized decision-making

Unstructured Systems

Outdated Technology

Weak Supply Chain management

Limited Exposure

Low Export Readiness

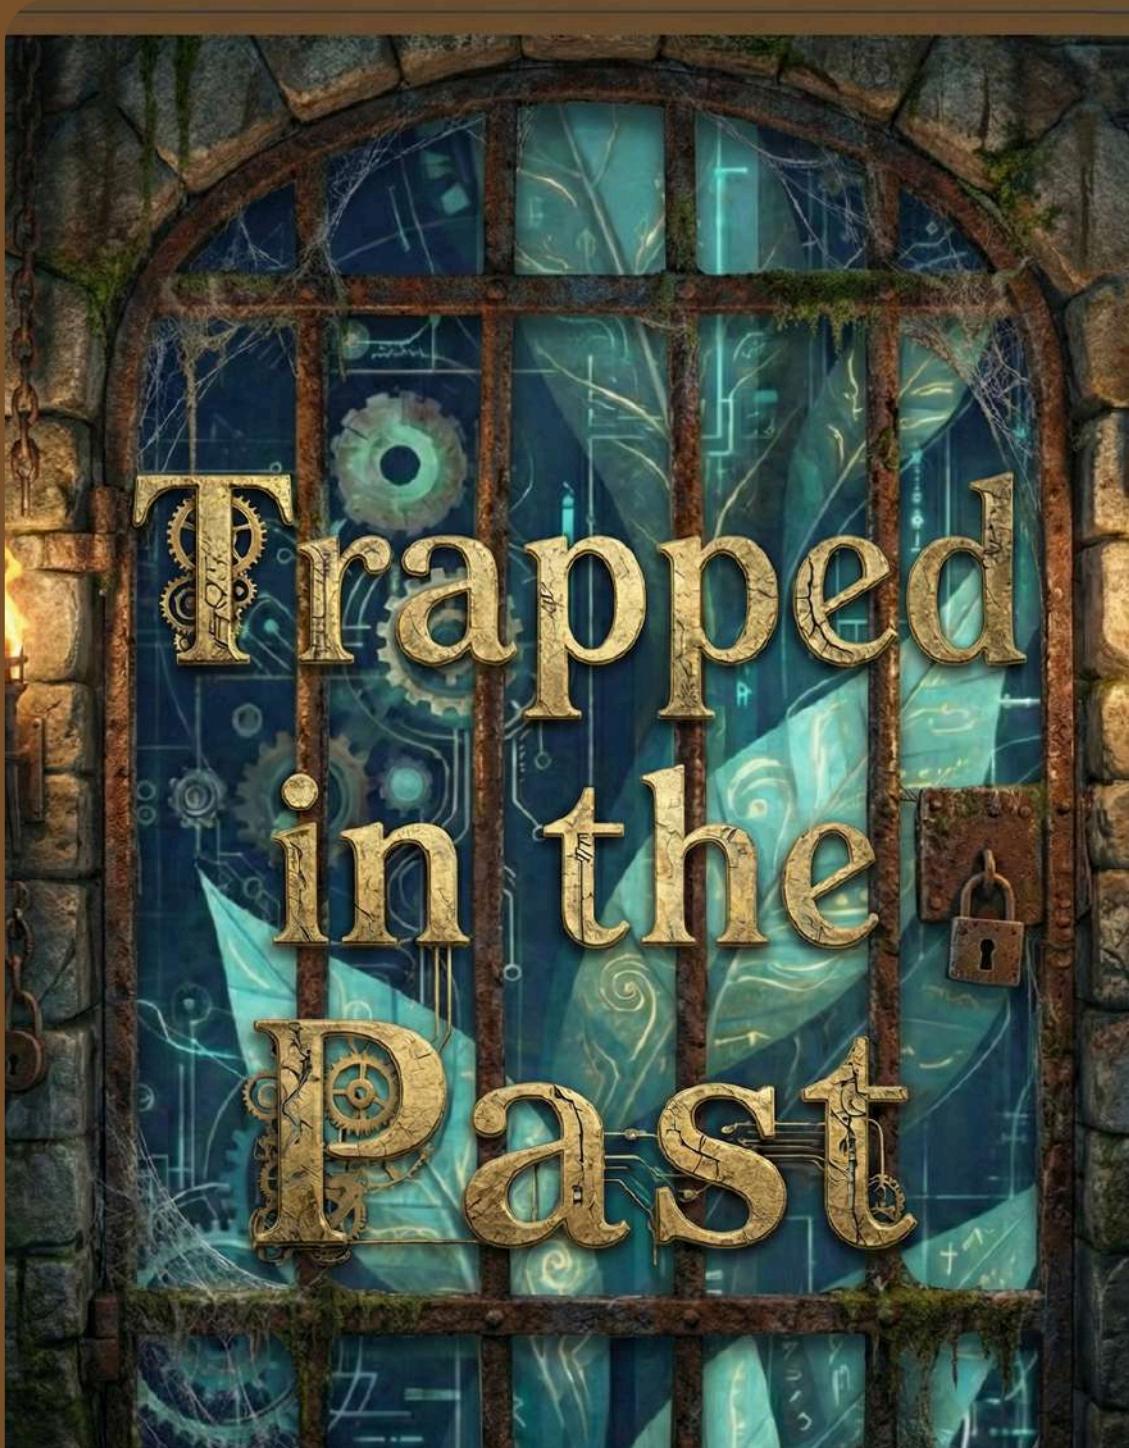

Low Investment Readiness

Low competitiveness

Business stagnation

High investment risk

The Perfect Storm for SMEs

Over 90% of SMEs operate in a trouble-shooting mode, with manual, unstructured systems & centralized decision making, costing economies billions in lost productivity every year.

- ✓ **Technology Gap:** Traditional SMEs struggle while digital thrive.
- ✓ **Economic Pressure:** Rising costs & currency volatility demand efficiency.
- ✓ **AI Revolution:** First-movers win and accelerate, late adopters risk falling behind.
- ✓ **The Missing Middle:** SMEs too big for microfinance, commercially unattractive for traditional banks.

How we create change?

RootRise:

A Hybrid Intelligence Infrastructure for SME Growth

AI-Powered, Human-Guided (&I)

Human-in-the-loop: associates embedded at SMEs and senior domain experts provide inputs and validations

Comprehensive Workflow

Structured, actionable path for SMEs to grow, scale, and become investment ready (diagnostics, growth plans, guided implementation, monitoring and continuous improvement)

Adaptive to different mandates and objectives

From growth, export access to green finance, from innovation to operational upgrading.

Intelligence That Adapts. Growth That Endures.

The RootRise Methodology ... AI &

1. Diagnose

Multi-layer AI-powered assessment across defined dimensions, customized to context, sector, and SME vision and maturity level. Delivers actionable growth plans.

2. Transform

Implementation of growth plans across all business units. AI-assisted implementation with embedded "Transformation Associates" and "Senior Experts" inputs and validation.

3. Sustain

Real-time analytics and dynamic SME profiling within a centralized data warehouse. Continuous monitoring via AI dashboards. Limitless data-driven upgrading opportunities.

AI Backbone - Senior Expert Guidance - Embedded Associates

Technology built for the people, by the people with the people.

RootRise Is a Breakthrough, Not an Incremental Tool

Hybrid Intelligence

- Blends AI agents, expert insights into one coordinated system
- Powered by a unified data warehouse and a modular application layer
- Creates reliable, context-aware intelligence

Built on Real SME Realities

- Learns from structured SME profiles
 - Data captured in a centralized data warehouse, real field diagnostics, and sector-specific knowledge.
- Ensures relevance to MENA business behavior, constraints, and market realities

A Continuously Improving Engine

- Each diagnostic, expert validation, and implementation cycle feeds back into the intelligence layer
 - Strengthened accuracy, contextual depth, and predictive capability
- With every SME added, the system compounds in value

Designed to Scale

- A cloud-based, modular architecture, with workflow automation, role-based access, and secure, multi-user interfaces
- Enables multi-SME, multi-sector programs to run at scale
- Consistent, secure, cost-efficient, and enterprise-ready

RootRise isn't a tool. It's the technology infrastructure powering SME growth at scale.

The RootRise Intelligence Architecture

Not a chatbot. Not a wrapper. A purpose-built intelligence infrastructure.

Application Interface

Role-based dashboards • Multi-user access • Workflow automation • Real-time monitoring

Multi-Agent Orchestration

Specialized AI agents coordinate: Diagnostics Agent → Growth Planning Agent → Implementation Agent → Monitoring Agent

Contextual Intelligence Engine

Sector-specific reasoning • MENA market models • SME maturity frameworks • Validated transformation logic

Unified Data Warehouse

Structured SME profiles • Field diagnostics • Transformation history • Continuous learning corpus

Human-in-the-Loop - the &/s

Every AI output passes through validation gates:

- Embedded Associates — on-site at SMEs, providing real-time ground truth
- Senior Domain Experts — validating AI outputs before delivery
- SME Owner Sign-off — final confirmation before action

Continuous Learning

Every diagnostic, validation, and implementation cycle feeds back into the intelligence layer — compounding accuracy with each SME served.

Architecture designed for enterprise-grade scale, security, and multi-tenant deployment.

Beyond the Chatbot: Multi-Agent Orchestration

Specialized AI agents working in concert — each optimized for its domain

Diagnostics Agent

Multi-dimensional assessment across 8+ business areas.
Sector-aware scoring.
Gap analysis and maturity mapping.

Output: Structured diagnostic profile

Growth Planning Agent

Generates prioritized roadmaps. Resource allocation. Timeline sequencing. Quick-win identification.

Output: Actionable transformation plan

Implementation Agent

Task breakdown and assignment. Progress tracking. Blocker identification.
Adaptive re-planning.

Output: Guided execution workflow

Monitoring Agent

Real-time KPI tracking. Anomaly detection.
Performance benchmarking.
Proactive alerts.

Output: Dynamic SME profile

Orchestration Layer State management • Context passing • Error handling • Retry logic • Human handoff

The &Eye: Transformation Lenses

What does the SME owner want to achieve? The lens focuses everything toward that goal.

Export Readiness

"I want to sell internationally — show me what I need to get there"

Investment Attraction

"I want to raise capital — make me investor-ready"

Profitability Focus

"I want to maximize margins — find the leaks"

Succession Planning

"I want to hand over to the next generation — prepare the business"

Digital Transformation

"I want to modernize — show me the technology roadmap"

Sustainability

"I want green certification — make us ESG compliant"

"The same SME, analyzed through different lenses, gets different — but equally rigorous — transformation paths."

— 15 TRANSFORMATION OBJECTIVES

THE &EYE — YOUR LENS

Your burning desire. Select your objective and we'll prioritize everything around YOUR goal.

Same business, different goal = different diagnostic priorities

Export Readiness vs. Succession Planning — completely different analysis

Made For You — architecture, not marketing

What RootRise Is — And What It Isn't

Distinguishing infrastructure from tools

RootRise is NOT

A ChatGPT wrapper

Generic prompts → generic outputs. No SME context, no validation, no accountability.

A simple API integration

Single-call responses without state, memory, or multi-step reasoning.

An off-the-shelf SaaS tool

Western-designed, one-size-fits-all solutions blind to MENA market realities.

AI-only automation

Unsupervised outputs that miss nuance and create risk.

RootRise IS

Purpose-built intelligence infrastructure

Orchestrated AI agents, unified data warehouse, workflow automation.

Multi-agent orchestration system

Specialized agents with state management, context passing, and human handoffs.

MENA-native intelligence

Trained on regional SME realities, market behaviors, and sector-specific constraints.

Human-in-the-loop by design (&I)

Every critical output validated by embedded associates and senior experts.

CHATBOT
Prompt → Response

ROOTRISE
Data → Intelligence → Action → Validation → Learning

The architecture enables reliable, scalable, accountable AI — not just impressive demos.

Platform in Action

From configuration to actionable roadmap — see the complete user journey

Our Reachable Opportunity

**SMES: 322 M Globally, 23 M in MENA, 4 Million in Egypt
+Levant, 1.5 M in GCC; A Large and Underserved SME Market**

Note: The opportunity extends far beyond this region, and global potential is 10x larger.

Our Reachable Opportunity, Continued ...

**Over 5.5 million
SMEs**

Across Egypt, the Levant, and the GCC; one of the world's densest SME regions, least digitally supported.

550,000 Growth-Oriented SMEs

~10% of SMEs are actively seeking to grow, digitize, export, and raise capital, primarily through government and donor-supported programs.

3,000–5,000 SMEs by Year 5

Blended Model leads to \$10–12M annual revenue by Year 5, without requiring full commercial pricing for every SME.

Our growth path combines

- Direct SME subscriptions (high per-SME revenue)
- Large donor/government programs (lower per-SME revenue, high scale)

Strong Institutional Demand Already Exists: In MENA + GCC, Governments, donors, and development funds collectively invest \$1B+ annually on SME non-financial services (SME competitiveness, digitalization, green upgrading, and job creation, etc.). And \$ 0.2 B SME self purchased services (TOTAL 1.2 B)

Path to Scale

Y1: Foundation

~ 40 SMEs

\$120K ARR

Market: Lebanon

Y2: Growth

~200 SMEs

\$660K ARR

Expansion: Egypt, KSA

Y3: Profitability
